Fastmarkets Dashboard Release Notes

14th January 2020
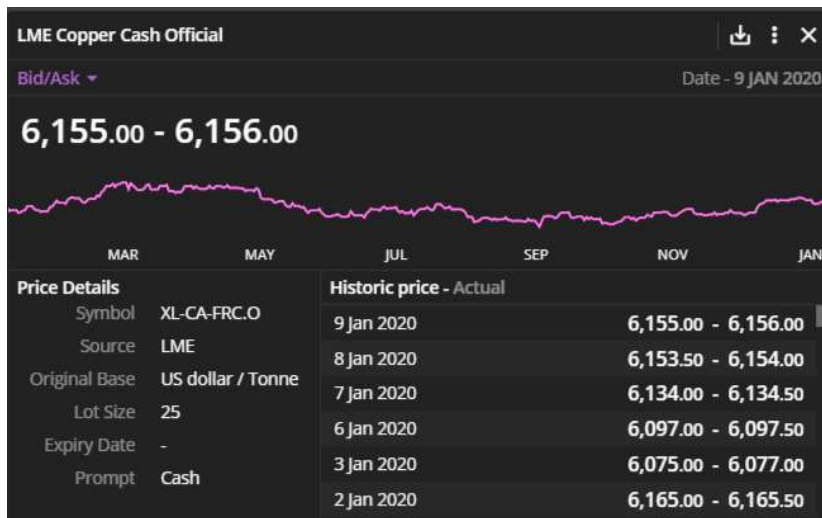

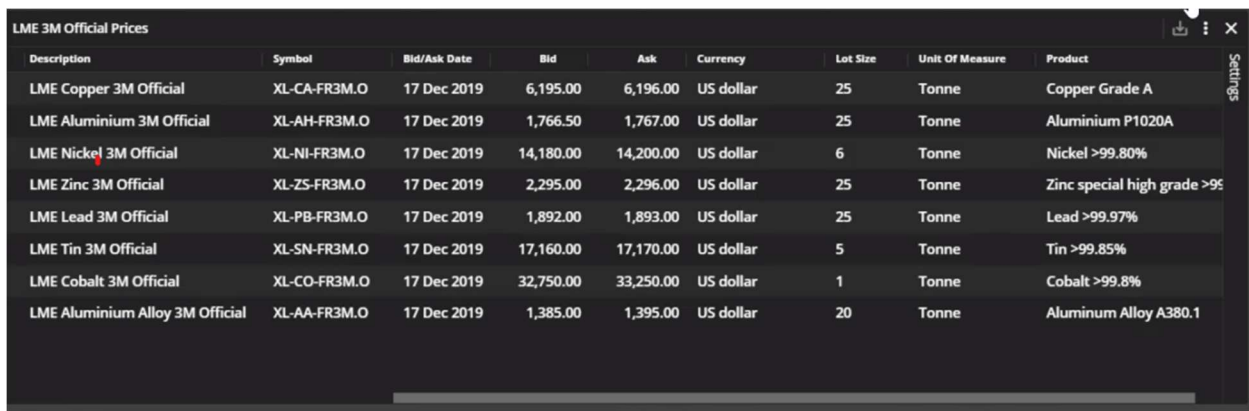

Version 1.4.971

What's New?

1.Exchange prices

One of the key new features of this release is the ability to display exchange benchmark prices (LME, CME (COMEX/NYMEX), SHFE) alongside physical prices in the existing widgets. Previously, this data has only been available through pre-configured widgets but now you will be able to create your own Price Tile, Price Chart, Multi Price Table and Historic Price Table widgets with a combination of physical and exchange prices.

Price Tile widget example: LME Copper Cash Official Price

LME Copper Cash Official

Bid/Ask ▾   Date - 9 JAN 2020

6,155.00 - 6,156.00

| | MAR | MAY | JUL | SEP | NOV | JAN |

Please note that there are some functionalities which are not yet available for exchange prices.

- Widgets which only contain exchange prices cannot be converted
- Widgets which contain a combination of exchange and physical prices can be converted but the conversion will only be applied to the physical prices.
- Copy for Excel Add-in functionality is not yet available for widgets which contain exchange prices. However, Price Tile, Price Chart, Multi Price Table and Historic Price Table widgets can be copied as values only or exported as XLS / CSV.
- Pre-configured exchange price widgets cannot be converted or exported yet.
- The Expiry date field is only available currently for COMEX and NYMEX instrument. In the future this field will be available for SHFE and LME instruments as well.
- Change and % change fields are not yet available for exchange prices.
- It's not yet possible to save exchange prices to your favorites.

2.Published averages

This version will enable you to display published averages in Price Chart, Multi Price Table and Historic Price table widgets. Previously, this data has only been available in the Price Tile widget.

Multi Price table example:

Aluminium P1020A premium, ddp Midwest US, US cents/lb	MB-AL-0020	Nov 2019	16.46	-6.74%
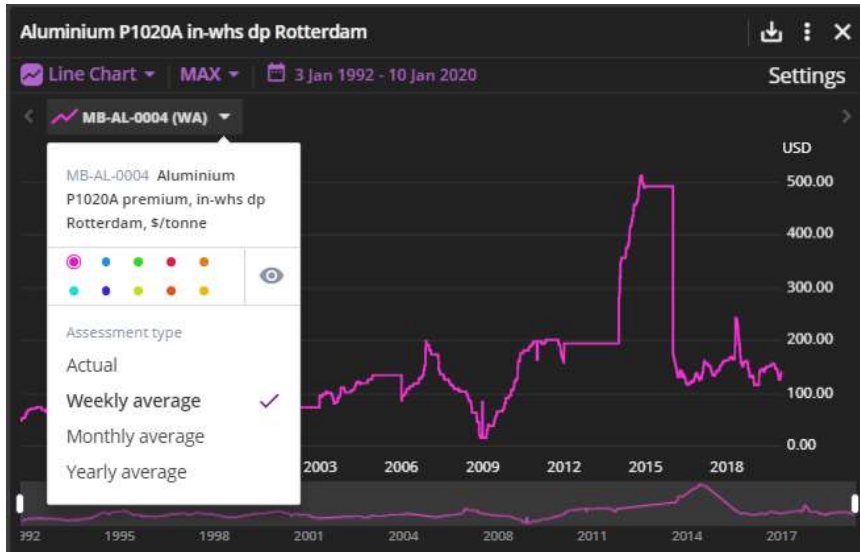

Price Chart widget example

Historic Price Table widget example:

3. Maximum number of prices in a Price Chart widget

This version will enable you to display up to 8 instruments in a Price Chart widget. This has been increased from the previous maximum of 5 instruments giving you the possibility to display a larger set of instruments in a single view. We have also re-designed the field selection control to make it really easy to use. You can now choose from displaying Low or Mid or High or Low & High fields.

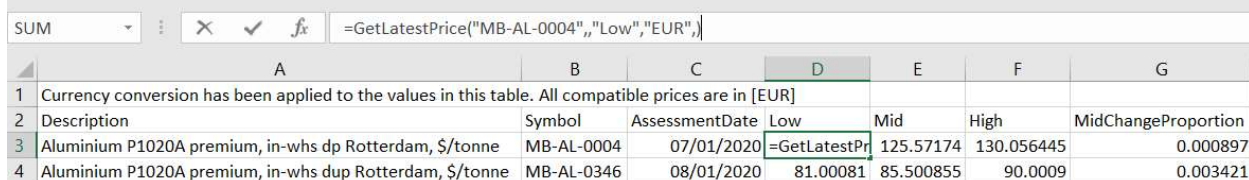

4.Conversion

This version will enable you to export a converted widget into Excel either as a flat file or using the Fastmarkets Excel add-in functions.

5.Improved login page

Our new login page will provide you with a set of help features should you experience any issues. The 'Don't have access? Get access now', 'Support' and 'Contact us' links will take you directly to different areas of our support pages where you can get assistance.
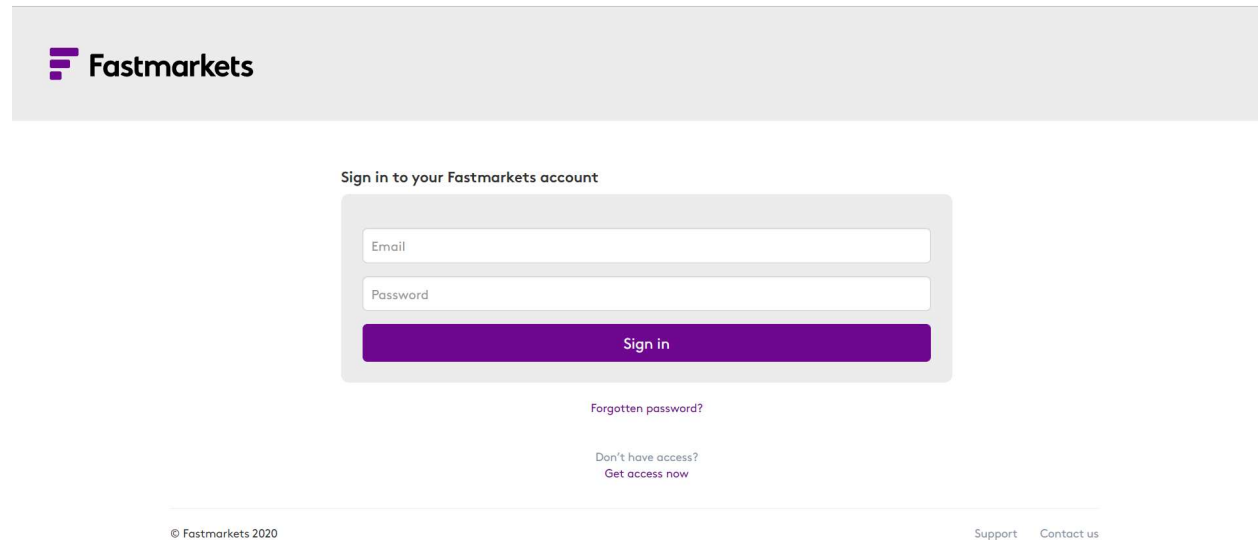

6. Release notes in the installer window

When a new version becomes available, you will be notified at login and you will find a short summary of the new features within the login window to keep you always up to date.
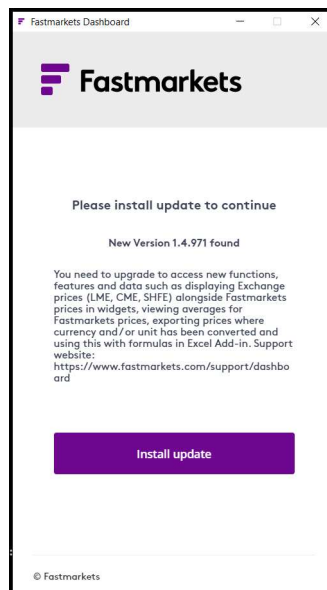

Breaking Changes

There are no breaking changes with this release.
